

Jatin Gupta

Full Stack .Net Developer | CMS (Umbraco & Sitefinity)

jatingup08@gmail.com | +917771053395 | [LinkedIn](#) | [Portfolio](#)

Summary

Full Stack .NET Developer with 3+ years of experience in building scalable Web API solutions, Headless CMS (Umbraco/Sitefinity), JWT Authentication, Microservices, SQL Optimization and Azure-based deployments. Experienced in building high-performance .NET Core applications using REST APIs, Clean Architecture, DI, CI/CD Pipelines and Cloud-driven development.

Experience (Over 3 years)

Full Stack .Net Developer, Zenesys Technosys Pvt. Ltd. - Noida (Uttar Pradesh)

Nov 2024-Present

- Developing **Headless CMS solutions** using **Umbraco CMS** integrated with **.NET** for scalable and flexible web applications.
- Building and optimizing **REST APIs** to deliver structured content (JSON) for frontend frameworks and third party integrations.

Full Stack .Net Developer, Techharvest Solutions Pvt. Ltd. – Satna (M.P)

April 2023 – Oct 2024

- Designed and developed dynamic, scalable website layouts and user interfaces using **Sitefinity CMS** with **.NET**.
- Integrated external APIs to push data into Sitefinity's **dynamic modules and blog system** for automated content updates.

.Net Developer, V.I.T.S. Engineering College - Satna (M.P)

July 2022 – March 2023

- Led the development of the **college website** using **ASP.NET** and **SQL Server**, focusing on a scalable and maintainable architecture.
- Designed responsive and user-friendly UI/UX layouts tailored for academic institutions.

Projects

GuildSuper

- Developed web pages in Sitefinity CMS based on provided designs and layouts, ensuring accurate implementation and responsiveness.
- Developed and customized forms in Sitefinity according to specified layouts, enhancing user interaction and data collection functionality.

Blackbox

- Implemented multi-language translation for pages in Sitefinity using JavaScript, enabling seamless content adaptation across different languages.
- Integrated tag functionality in Sitefinity widget templates, allowing dynamic content categorization and improved content management.

RedSail

- Implemented rich user interfaces using Kendo UI and Vue.js integrated with .NET backend.
- Integrated REST APIs and implemented protected routes to securely store and manage product stock data.

Svensk Travsport

- Developed and integrated Headless CMS APIs using Umbraco CMS v16 and .NET 9, Content Migration.
- Implemented SSO (Single Sign-On), performed content migration, and built APIs to fetch structured data from Umbraco Backoffice.
